Professional Summary

MERN Stack Developer specializing in backend architecture, scalable REST APIs, and production-ready deployments. Proficient in Node.js, Express, MongoDB, and React. Skilled in JWT authentication, RBAC, query optimization, and API performance tuning. Actively expanding into DevOps and cloud technologies (Docker, AWS).

Technical Skills

Languages

JavaScript (ES6), TypeScript, HTML5, CSS3

Backend

Node.js, Express.js, RESTful APIs, JWT, RBAC

Frontend

React.js, Tailwind CSS, Context API, React Router

Database

MongoDB, Mongoose ODM, Query Optimization

Tools & DevOps

Git, GitHub, Postman, Docker (Learning)

Work Experience

Campus Ambassador Intern

July 2024 – Present

GirlScript Summer of Code (Remote)

- Increased student participation in open source by 100+ through outreach campaigns and peer engagement.
- Guided 50+ beginners on Git/GitHub workflows, contribution guidelines, and open-source best practices.
- Acted as primary liaison between GSSOC organizers and student community for smooth communication.

Projects

Velnixa (E-Commerce Full Stack Application)

2024 – Present

Node.js, Express, MongoDB, React, Tailwind CSS

- Backend:** Built RESTful APIs for product, user, and order management with JWT authentication and RBAC.
- Database:** Designed optimized MongoDB schemas with indexes, reducing API response time by ~30%.
- Frontend:** Developed responsive UI with React/Tailwind CSS; integrated APIs for cart and checkout flow.
- Deployment:** Deployed backend on Render and frontend on Vercel/Netlify.

Achievements

- Selected Campus Ambassador** – GirlScript Summer of Code (GSSOC 2025)
- Full Stack Deployment** – Built and deployed Velnixa eCommerce application with API integration
- Active Learner** – Studying System Design, Docker, and AWS for production applications

Education

B.Tech in Computer Science (Expected 2028)

Graduation: 2028

Maharishi Dayanand University, Rohtak, Haryana | CGPA: 7.7 / 10

Relevant Coursework: DSA, DBMS, Operating Systems, Web Development
